BUILT TO CARRY THE DAY

Bring high expectations. Prepare to have them exceeded. Strength, durability and reliability are all standard equipment on the High-Capacity IC Pneumatic. It's a proven heavy hitter tough enough for your toughest jobs. Depend on it.

COUCHED IN COMFORT, HARD AT WORK

The High-Capacity IC Pneumatic makes even the toughest jobs feel less demanding. Large dual assist grips and low, wide steps ease entry and exit. A spacious, full-floating operator compartment reduces noise and cushions vibrations. And a multifunction full-suspension seat with dual armrests puts you comfortably in control. There's even an electronic parking brake switch that eliminates the need to lean forward, reducing back strain. You may be working hard, but it won't feel like it.

PRECISION HYDROSTATIC POWER STEERING

AN INVESTMENT THAT PAYS YOU BACK

Some competitors are content to design a forklift and build it out with systems bought off the shelf. Toyota demands better for its customers. The High-Capacity IC Pneumatic, like all Toyota forklifts, is engineered from the ground up as a finished product. One with better components and well-thought-out integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota forklifts don't require a lot of service. But when they do need service, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs. Higher residual value is another bonus.

IN IT FOR THE LONG HAUL

The Toyota High-Capacity IC Pneumatic Forklift does more than carry its weight. It goes the distance. Properly maintained, Toyota forklifts deliver years of dependable use. In fact, Toyota has been proven the most dependable, reliable and safe line of forklifts you can buy. Welcome to the forklift designed to pass any test. Including the test of time.
