AN INVESTMENT THAT PAYS YOU BACK

Some competitors are content to design a forklift and build it out with systems bought off the shelf. Toyota demands better for its customers. The 6-Series Order Picker, like all Toyota forklifts, is engineered from the ground up as a finished product. One with better components and well-thought-out integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota forklifts don't require a lot of service. But when they do need service, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs. Higher residual value is another bonus.

PROVEN ALL-PURPOSE PERFORMER

The Toyota 6-Series Order Picker is your proven solution for complex warehouse and distribution center applications. Best of all, it's a Toyota, proven the most dependable, reliable and safe line of forklifts you can buy.
