Why choose T-Matics COMMAND over other systems?

Easy to set up and use - generates benefits instantly, right out of the box[™]

- Pre-configured, universal hardware and automated set-up enable fast installation and consistent data for all vehicle types (other systems require complex, error-prone, manual configuration and testing that varies from vehicle to vehicle, especially on mixed-brand fleets)
- Remote hosting with automatic wireless data flows enable rapid, hassle-free system launch without IT resources (other systems require manual, error-prone, IT-intensive, complex wireless network set-up, security validation, and troubleshooting)

Reliable and effective - proven long-term results for Fortune 500 customers

- Technology in continuous, successful use for over 12 years
- Unique features for easy hardware swapping (others require complex decommissioning, re-installation)
- Patented self-diagnostics, supported by world-class 24/7, SAS-70 Data Center

Patented, innovative functionality

- Patented Impact Management, with automatic self-learning and system responses to 5 severity levels, for meaningful results without disruptive false alarms
- Patented group-based access control for easy system upkeep
- Patented event-driven checklists for flexible vehicle control
- Automatic PM management with patented lockout features
- Automatic email/reports to identify issues without having to login
- Hundreds of other unique features and competitive advantages developed over 12 years of field experience

Low monthly subscription – no upfront capital outlay - financing options available.
