

Cellular T-Matics MOBILE Vehicle Management System

**The Most Effective Way to Manage Forklifts
and other Industrial Vehicles.**

Why invest in Vehicle Management Systems (VMS)?

Toyota's innovative, turnkey solution that will give greater visibility to your fleet's performance!

• Increase uptime with error code monitoring	• Right size your fleet by monitoring actual forklift activity
• Leverage impact data to reduce asset damage	• Increase operator accountability for assets
• Maximize productivity by using data	• Keep track of where your assets are with GPS
• More efficient PM scheduling and less downtime	• Web based dashboards and reporting

Why choose T-Matics MOBILE over other systems?

Easy to set up and use - generates benefits instantly, right out of the box

- Cost-savings through efficient planned maintenance
- Plug-and-play install with no IT involvement
- Factory and aftermarket installation options
- Financing alternatives available
- Supports a wide range of material handling equipment including both Toyota and non-Toyota brands for complete fleet operations management solution.

Quality, Durability, Reliability and Value

- Technology backed by Toyota's history and reputation
- Workable on all makes of material handling equipment
- Tamper resistant installation

Innovative, turnkey functionality

- Impact management solution with automatic email alerts
- 30-day memory for data storage
- **NO** facility hardware required
- Practical, web-based reporting for easy access
- Perfect for rental fleets and material handling equipment that move from location-to-location
- Practical for fleets of one to thousands!
