TOYOTA GENUINE PARTS

PARTS THAT ARE MADE BETTER.
GUARANTEED.

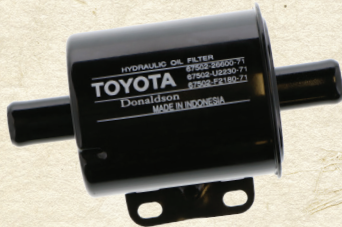

There are thousands of reasons why Toyota forklifts rank first in the industry – all of them are built from Toyota Genuine Parts. Our parts offer exceptional quality from the moment they come off the production line, making them the top choice of Toyota Certified Technicians.

Toyota 360 Support uses Toyota Genuine Parts because we're dedicated to keeping your Toyota a Toyota. So, it will retain its high quality, extreme durability, and resale value for as long as you own it.

Toyota Genuine Parts are engineered and manufactured to precise specifications for peak performance and long life. Both the originals and the replacements.

So why would you want to roll the dice on a non-OEM part?

YOU CAN'T IMPROVE ON AN ORIGINAL. BUT YOU SURE CAN SCREW IT UP.

Toyota Genuine Parts carry a two-year warranty. That's twice as long as our closest competitor. And with Toyota 360 Support, that warranty also covers the labor needed to replace any part on your forklift.

The reason our warranty is so long is that Toyota is confident in our work. Our aftermarket quality control system verifies that every Toyota Genuine Part is built to the same exacting tolerances and quality control standards as the part it replaces.

On the other hand, who knows what standards other manufacturers' parts are built to? Your forklift is the last place you want a part's specifications to be "in the ballpark."

YOU SHOULDN'T HAVE TO WAIT FOR THE GOOD STUFF.

Toyota 360 Support knows that downtime is a dirty word. That's why all parts orders are available for next-day shipping. Because what good is offering the very best parts possible if they're not ready when you need them?

And there's one last guarantee Toyota 360 Support delivers on our parts – you're not going to get this range of benefits from any other parts supplier.
