YOUR BUSINESS IS RIDING ON IT.

OPERATIONS

YOU'RE GETTING MORE THAN A FORKLIFT.
YOU'RE GAINING A PARTNER.

Alejandra – 360 Technician,
Southeast Industrial Equipment,
Charlotte, NC

We work faster and leaner so your company reaps the benefits.

Toyota 360 Support is always working at our highest gear – while never compromising quality – to make sure your company's operations are moving at maximum efficiency.

INDUSTRY'S BEST LEAD TIMES

When it's time to add a forklift to your operations, you want it yesterday. Toyota 360 Support offers the industry's best lead times to move forklifts from our plant to your floor in the fastest time possible.

TOYOTA COMMERCIAL FINANCE

Do you want to lease, purchase, or rent a forklift? Do you want it new or used? It's not our bottom line that's our top priority, it's yours. The financing arm of Toyota 360 Support is Toyota Industries Commercial Finance (TICF). The experts at TICF have helped put forklifts in facilities from coast to coast. They can help you navigate the range of equipment and financing options available so you get the machinery that gets the job done at a price you can afford.

FLEET MANAGEMENT AND TELEMATICS

Toyota 360 Support T-Matics provides a round-the-clock window into the condition of your forklifts. The result is valuable data that helps you run a smoother and more efficient operation. Whether you have one forklift or a fleet of 51, T-Matics ensures your machines are being utilized as smartly and efficiently as possible.

You receive real-time, actionable data that helps you make the smart calls on safety and training, maintenance schedules, and other operational concerns that directly impact your profitability.

T-MATICS FOR IMPROVED MANAGEMENT

Forklift Fleet Tracking – Gain a window into your fleet at all times.

Electronic Safety List – Mandate automated operator checklists before use, which eliminates paper and improves accountability and safety.

Maintenance Tracking – Receive timely notifications on planned maintenance needs and link directly to your dealership for time-sensitive service intervals.

Web-based Reporting – Generate benchmarks and report results daily, weekly, quarterly, and/or yearly, which help you make more informed, data-based decisions.

Impact Alerts – You're alerted immediately if any of your forklifts encounter an impact.

Operator Limits – Set permissions to ensure forklift is being used only by certified operators.

T-Matics is exclusively available from Toyota 360 Support and is offered at two levels:

T-MATICS MOBILE

Intended for any size fleet, T-Matics MOBILE is a cellular-based system ideal for forklifts that aren't locked to a single location. It features a plug-and-play install (with no IT involvement), factory and field installation options, electronic hour meter collection, error code reporting, and fleet utilization.

T-MATICS COMMAND®

Designed for fleets of any size, T-Matics COMMAND is a wireless forklift management system that collects data via Wi-Fi® or iRF cellular within a designated facility. Benefits include electronic North American safety standards checklists, automated alerts and reporting, auto-calibrated impact management, planned maintenance management, operator access control, and more.
