ELECTRIC MOTOR RIDERS

ToyotaForklift.com

# STAND UP TO THE CHALLENGE

## TOYOTA'S STAND-UP RIDER

sets the standard for performance, efficiency, and operator comfort. Engineered for demanding warehouse environments, this versatile workhorse delivers lifting capacities ranging from 3,000 to 5,000 lbs., making it ideal for dock-to-stock applications.

## ADVANCED AC DRIVE AND LIFT SYSTEMS

maximize energy efficiency while providing smooth, responsive acceleration and precise load control, helping extend battery life and maintain high productivity throughout every shift. Electric power steering reduces operator effort and fatigue, allowing for confident handling and faster cycle times, even in tight spaces.

## WITH A COMPACT FOOTPRINT,

three- or four-stage mast options, and lift heights up to 270 inches, Toyota's Stand-Up Rider easily navigates narrow aisles, helping you store more product without sacrificing performance.

DESIGNED FOR

5,000 LB.  
LOADS

# TOYOTA'S ENERGY SOLUTION OPTIONS

## LITHIUM POWER FOR EVERY OPERATION

Powering your operation starts with the right battery and Toyota Lithium-ion Batteries deliver. Engineered for reliable, consistent, sustainable performance, these solutions are built to keep up with the fast-paced, demanding material-handling environments. With higher energy density and rapid charge capabilities, Toyota's Lithium-ion Batteries provide dependable power while limiting interruptions. They're designed to fit alongside your shift schedule, fleet size, and application – from large-scale to single-shift operations. Power that works just as hard as you do. That's Toyota.

## WHY CHOOSE A TOYOTA LITHIUM-ION BATTERY?

- **UL Certification** to meet compliance requirements, while enhancing safety and performance
- **Maintenance-Free Sealed Battery** eliminates the need for watering, equalizing, and replacing batteries
- **Battery Management System** enables communication between the forklift and the battery for continuous information updates, such as battery state of charge
- **Various Voltage and Capacity Configurations** allow for customization to suit different fleet sizes, shift schedules, and applications

# ADVANTAGES OF THE STAND-UP RIDER

---

**60" OPERATOR BACKREST** provides an operator compartment with a cushioned pad for all day comfort

**REGENERATIVE PLUGGING** returns energy to the battery, for increased efficiency and runtime

**AC DRIVE AND LIFT MOTORS** provide superior performance and energy efficiency as well as reduced maintenance costs due to fewer moving parts

**MULTIFUNCTION CONTROL HANDLE** provides all travel and hydraulic functions for increased productivity and ergonomics

**7" MULTIFUNCTION COLOR TOUCHSCREEN DISPLAY** provides customized performance at your fingertips, including a load weight indicator, mast tilt and lift height indicator to improve material handling confidence

**ADJUSTABLE STEER TILLER** provides the operator with a customized handling position for optimized comfort shift after shift

**ADJUSTABLE ARMREST** provides the operator with a customized shoulder and arm position for enhanced all day comfort

**PRECISION LOAD STABILITY SYSTEM** enhances vehicle stability and load control through intelligent speed and motion management

# COMFORT AND PRODUCTIVITY REIMAGINED

---

Toyota's Stand-Up Rider helps reduce operator fatigue in demanding warehouse environments. The comfort ride suspension features a specially engineered floor system that adapts to each operator's weight, minimizing vibration and delivering a smoother, more stable ride.

Additional comfort touches include an operator knee pad and a cushioned, extended backrest, providing enhanced support and stability during frequent starts, stops, and directional changes. Together, these features help operators maintain a more natural, supported stance over extended periods of operation.

Intuitive, full hydraulic controls further enhance ease of use, allowing operators to keep one hand on the steer tiller while the other manages travel, lift, load, and horn functions. This ergonomic layout promotes confident control, reduces strain, and helps operators stay focused and productive.

# A NAME YOU CAN TRUST

Our machines carry something no others can: the Toyota name. One of the world's most respected global brands, Toyota is synonymous with quality, durability, and long-term value. Delivering a level of confidence that few companies can match.

Every Toyota forklift is engineered using the world-renowned Toyota Production System (TPS), built on just-in-time parts delivery and quality checks at every step of the manufacturing process. The result? Consistent performance, reliability, and precision you can count on.

Behind it all is Kaizen, Toyota's philosophy of continuous improvement. Established by our founder more than 80 years ago, Kaizen drives us to refine processes, elevate quality, and never settle. As long as our forklifts carry the Toyota name, we'll keep raising the standard-so your operation can, too.

## AN INVESTMENT THAT PAYS YOU BACK

Toyota demands more, so you get more. Built with premium components and meticulously engineered, Toyota forklifts deliver intuitive, dependable performance shift after shift. When service is needed, it's fast and straightforward by design. Legendary Toyota quality means greater uptime, lower repair costs, and ultimately a higher residual value. That's a strong return on your investment.

# MYINSIGHTS®: WHERE SMART COMES STANDARD

**MYINSIGHTS®, TOYOTA'S TELEMATICS SOLUTION** is standard on nearly all Toyota forklifts, and transforms real-time data into clear, actionable insights. MyInsights® helps you improve performance, streamline scheduled maintenance, and predict issues before they impact your operation. It's a simple, built-in way to maximize uptime and strengthen your operation's productivity and efficiency – benefits you receive all because you're a Toyota customer.

## STANDARD DATA YOU RECEIVE:

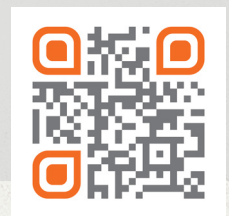

- **Key Hour Meter:** Eliminate manual hour tracking and optimize usage to minimize long-term costs.
- **Impact Detection:** Visibility to impact events that may indicate equipment or facility damage.
- **Error Codes:** Gain insight into equipment errors and maintenance issues that may require service.
- **Equipment Location:** Increase fleet awareness and know your equipment's last known location.

**MY** Insights®

## TAKE FLEET MANAGEMENT EVEN FURTHER WITH MYINSIGHTS® SUBSCRIPTION PACKAGES.

These enhanced packages unlock deeper analytics and include OSHA-required pre-operation checklists and badge access control to expand your fleet's visibility, strengthen compliance, and boost performance to an all-time high.
