

STAND-UP RIDER

BUILT TO PERFORM: CONFIGURED YOUR WAY

Toyota's Stand-Up Rider is a highly customizable, powerhouse designed to build on Toyota's proven durability and top-tier performance. Engineered to adapt to a wide range of warehouse demands - including dock-to-stock workflows. The Stand-Up Rider is available in lift capacities from 3,000 to 5,000 lbs. A range of package options allows customers to tailor performance, ergonomics, and operational features to best fit their needs, while maintaining maneuverability and performance. The Stand-Up Rider not only performs in tight spaces and demanding environments, but it is purpose-built to maximize productivity, uptime, and long-term reliability.

Models: Available in 8FBA15-25U
