

HOT SHEET CORE ELECTRIC

8FBCU20-32

8FBCU20-32 KEY TOYOTA POINTS:

- **Proven Performance*:** Comprehensive cycle testing shows that Toyota's 8FBCU25 model completes a cycle 5.6% faster while consuming approximately 5.7% less energy than the UniCarriers BCX50N.
- **Welcome Aboard:** No seat hip restraints, ample step and floor surfaces, and large dual operator assist grips improve entry and exit and reduce downtime.
- **Comfortably in Control:** Thoughtfully designed, cowl-mounted hydraulic controls with auto-fork leveling reduces operator fatigue and improves productivity.
- **Get Your Motor Running:** Toyota designed and proven AC traction and pump motors provide superior durability, reliability, and performance.
- **A Visible Difference:** Toyota offers superior visibility in all directions thanks to a wider mast window, roll-formed overhead guard pillars, and clear sightlines to elevated loads.

*Testing based on both loaded and unloaded travel with both forklifts in "Performance" mode and similar forklift configurations.

TOYOTA COMPETITIVE ANALYSIS

► TOYOTA 8FBCU25

► UNICARRIERS BCX50N

System of Active Stability™ and Active Mast Control™ monitor forklift conditions and automatically reacts to reduce the likelihood of a tip-over when traveling and load handling

Multi-function display provides access to all diagnostic and programming capabilities as well as maintenance functions

Toyota designed AC pump and traction motors are well protected and easily serviced through the side panels

Standard 4-way adjustable vinyl full-suspension seat with side bolsters improves overall operator comfort

No-tools-required floorboard with soft rubber mat is more comfortable and allows for quick service access

Steel-reinforced load backrest with angled crossbar for superior durability and fork tip visibility

No swing lock cylinder, Active Mast Control™, nor automatic fork leveling. Stability enhancement consists of a rubber block mount on the steer axle

Multi-function display lacks advanced diagnostic features and functionality

Hydraulic pump motor is hidden below the battery and drip plate where it is exposed to dirt and grime

Standard fabric seat with hip restraints and no seat back angle adjustability reduces operator comfort

Metal two-piece floorboard is less comfortable and requires bolts to be removed for service access

Minimal protection for load backrest bolt heads and flat lower crossbar reduces durability and fork tip visibility
