

Single Story Buildings

A-WALL Building Systems install faster and are more flexible than permanent construction. A-WALL can be disassembled, relocated or reconfigured as your needs change.

Additional benefits include....

- Quiet, Fire-Safe Construction
- Prefinished Panels - No Taping, Sanding or Painting
- Factory Installed Receptacles, Switches and Data Boxes
- Significant Tax Savings
- Simple Assembly Using Common Hand Tools
- Turn-Key Installations Available

Offices on Pre-Engineered Mezzanine

CMM Room with Roll-Up Door

Modular Office Walls

In-Plant Offices Sharing a Common Wall

Forkliftable Office

Modular Cleanroom

- Plant Offices
- Cleanrooms
- CMM Rooms
- Lunch Rooms
- Laboratories
- Equipment Enclosures
- Modular Office Walls
- Plant Partitions

Fast, Flexible, Affordable Construction

Two-Story Buildings

- Two-story design utilizes wasted, overhead space
- Provides excellent supervisory view for improved safety, productivity and security

Two-Story Shipping Office

Create Controlled Environments

A-WALL environmental rooms create the conditions you require to meet today's strict manufacturing standards. Whether you need a cleanroom to improve process quality or meet a regulatory standard, an isolation room to segregate a "dirty" process from the rest of your facility or a temperature controlled CMM room, A-WALL offers a cost-effective solution.

Build Greener with A-WALL

A-WALL panels, connecting components, wood doors and windows are manufactured using partially recycled materials. Ultimately, the entire wall system can be recycled. Unlike conventional construction, A-WALL is easily disassembled, relocated and re-used, which reduces demand for raw materials, minimizes waste sent to landfills and saves energy.

Exterior Buildings

- Durable, painted aluminum finish is maintenance-free
- Walls, roof and floor are fully insulated to R-12
- Operable Windows are insulated safety glass with screens
- Factory assembled and wired on a welded steel base

One man security booth.

A-WALL is faster than conventional construction.

Everything is pre-engineered.

Wiring and windows are factory installed in durable, prefinished panels for fast assembly. This means less disruption to your business and projects that are completed on schedule.

A-WALL changes with your requirements.

Pre-engineered A-WALL panels are interchangeable and 100% reusable. Your building can be expanded, rearranged or relocated to a new area or facility. You can't do that with stud and drywall.

Free site surveys, design assistance and estimates.

When you need to enclose personnel, a process or products, compare A-WALL to the cost of permanent construction. Your local A-WALL dealer, supported by factory engineers and talented installers, is prepared to assist you with your project from conception to completion...
Without breaking your budget.
