# POWERFUL, PRODUCTIVE, & ENVIRONMENTALLY FRIENDLY

UP TO  
**17,500** LB.  
CAPACITY

**TOYOTA'S 80V ELECTRIC PNEUMATIC FORKLIFT** line is in a class all its own. These electric powerhouses combine the power, durability, and reliability of internal combustion trucks with the economics and speed of electric forklifts. With a capacity ranging from 4,000-17,500 lbs., these machines are ready to tackle any challenge, whether you're operating indoors or outdoors.

Designed with the operator in mind, the operator compartment of the 80V Electric Pneumatic comes equipped with features to help them do their job quickly and efficiently. Overall noise and vibration levels are also much lower, resulting in stress and fatigue reduction. The full floating cabin and full-suspension seat significantly reduces shock and vibration for productive and comfortable operation.

This versatile lift delivers top travel speeds courtesy of the powerfully efficient AC Drive Motor, which provides longer runtimes aided by regenerative braking, giving you the power to get more done quickly. When you need raw power to tackle outdoor challenges and efficient, environmentally friendly operation, look no further than Toyota's 80V Electric Pneumatic Forklift.

# 80V ELECTRIC PNEUMATIC ADVANTAGES

▶ **SYSTEM OF ACTIVE STABILITY (SAS)™** automatically detects potentially unsafe conditions and engages additional features to assist in increased operator protection and reduced product and forklift damage

▶ **OVERHEAD GUARD** provides excellent visibility with standard configuration and optional cab

▶ **MINI-LEVER CONTROLS AND ARMREST** for a more ergonomic operation to lessen fatigue and increase productivity

▶ **POWERFUL LED** lights allow operators to work in dimly lit areas efficiently and provide lower energy consumption

▶ **OPTIONAL STEEL CABIN WITH WINDSHIELDS AND WIPERS** helps protect operators from outside elements such as cold weather, wind, and dust

- ▶ **FULL FLOATING CABIN** with full-suspension seat offers smooth, comfortable operation while minimizing vibrations

- ▶ **COCKPIT STYLE OPERATOR'S COMPARTMENT** features a low height dashboard and tilt & telescoping steering column with electric power steering for excellent visibility, legroom, and comfort

- ▶ **AUTOMATIC PARKING BRAKE** automatically engages when the forklift comes to a complete stop

- ▶ **REAR ASSIST GRIP** increases operator comfortability and productivity when driving in reverse

- ▶ **MULTIFUNCTION DISPLAY** with programmable performance and power select function for customization based on application and driver preference

- ▶ **LIFT/LOWER SPEED CONTROL** automatically slows mast as it comes into free lift and dramatically slows forks near the ground to reduce damage and wear

# THE POWER TO CHARGE AHEAD

---

**AT TOYOTA**, we understand that you need a forklift that delivers the power and durability to get the job done. Our 80V Electric Pneumatic Forklift is a beast and designed to tackle all of your material handling needs. Whether you're working indoors or outside, our electric forklifts offer the same amount of power and durability your operation demands. Rugged enough to perform similar to internal combustion counterparts while running off a battery, Toyota's 80V Electric Pneumatic Forklift maintains clean air and low maintenance but supports traditional IC applications.

---

## FORCE-COOLED, LOW- MAINTENANCE WET DISC BRAKES

You expect your forklift to support your high-capacity operation. That's why Toyota's 80V Electric Pneumatic Forklifts come equipped with wet disc brakes. Covered in radiator hydraulic fluid to remain cool and coated when brake fluid is depleted, our wet disc brakes result in smooth, quiet operation even in the harshest environments.

Additionally, the advanced technology provided by the unique System of Active Stability (SAS)<sup>™</sup> helps to control forklift stability when loading, driving, and lifting.

## ADVANCED TECHNOLOGY AT YOUR FINGERTIPS

Knowledge and information power your productivity. Toyota's 80V Electric Pneumatic Forklifts come equipped with a multifunction display that provides key information such as an operating time display and battery capacity warning. Standard speed control and performance modes allow selection of power consumption, acceleration, and regenerative braking force, allowing tuning to maximize truck performance to your operation while balancing performance and operating time, leading to improved efficiency. Built-in diagnostics with error code displays allow troubleshooting through the display to quickly diagnose any issues and increase uptime.

---

## AN INVESTMENT THAT PAYS YOU BACK

Some competitors are content to design and build a forklift with systems bought off the shelf. Toyota demands better for its customers. It's a forklift with better components and meticulously planned integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota Forklifts don't often require service. But when they do, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs. Higher residual value is another bonus.

# WORLD-CLASS MATERIAL HANDLING SOLUTIONS

**PARTNER WITH TOYOTA, AND LET US HELP  
DEVELOP THE RIGHT SOLUTION FOR YOU.**

With access to the world's industry-leading lineup of material handling products, Toyota dealers are uniquely positioned to help you solve your wide-ranging challenges. Built for every application, Toyota can provide the most complete set of solutions for material handling, automation, energy, advanced logistics, and warehouse optimization.

Toyota is here to help optimize your business for maximum efficiency. Utilizing Toyota Lean Management principles, Toyota dealers can provide insights and develop appropriate plans to tackle your specific operational needs. This unique approach to optimization and elimination of waste can provide you with significant competitive advantages and a sustainable lean culture for lasting process improvement.
