

Increased visibility and less lost load for faster and efficient handling of palletized loads

C-SERIES INTEGRAL SIDESHIFTER:

Integral Sideshifters feature excellent specifications such as less lost load and better effective thickness, which optimizes truck capacity. With an integral sideshifter you get more out of your truck/attachment combination versus a hang-on sideshifter. Contact your OEM for information on the C-Series Sideshifter. The C-Series is available only through OEM's.

- Enhanced Visibility
- High Net Capacity
- Reduced Effective Thickness
- Fast and Easy 'No-Weld' Mounting
- Uniform Speed
- High-Pressure Cylinder
- Backrest Compatibility

The Revolution S

K-SERIES INTEGRAL FORK POSITIONER:

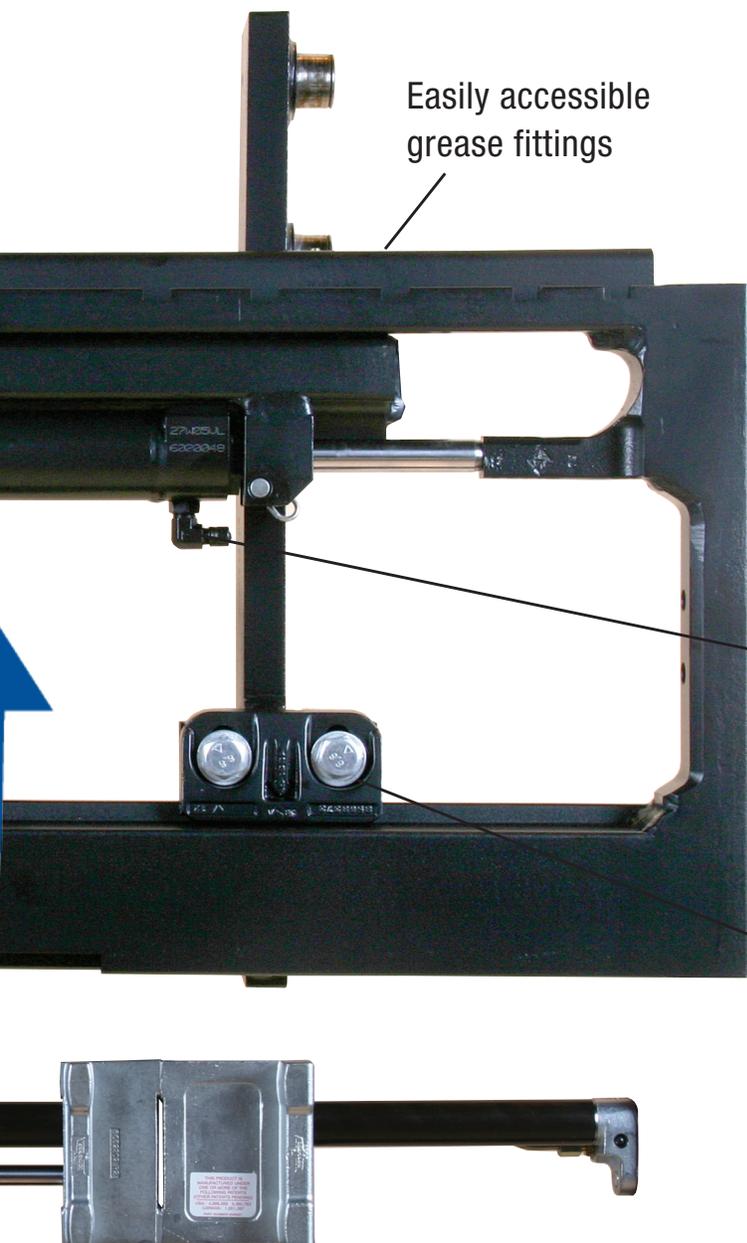

Now everyone can enjoy the benefits of a fork positioner. With Cascade C-Series Integral Sideshifters you can decide before or after the truck is ordered if you need additional functionality as your business grows. With a low cost easy to install kit, gaining the ease and safety of a fork positioner is just minutes away. So, go ahead change your mind, you're covered either way. Visit www.CascadeRevolution.com to learn more.

Why a Fork Positioner?

Improve Operator Safety. Avoid driver back strain and pinched fingers from manually moving forks on the lift truck.

Increase Productivity by eliminating the need for the driver to have to get on and off the truck to manually move the forks.

Reduce Damage by allowing the operator to accurately position the forks from the drivers seat for handling a variety of pallet sizes.

Easily accessible
grease fittings

Fork stops on upper
carriage to prevent forks
from disengaging

Fixed port locations
regardless of carriage
width. Uses standard
installation kits

Easily adjustable lower
hooks, no shimming required

Other Options

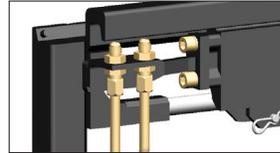

Bolt-On Pallet/Cylinder Guard
provides additional protection for the pallet and cylinders.

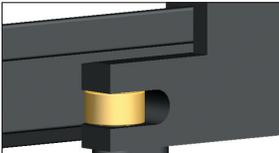

Pallet Protector
Prevents damage to the top deck boards of a pallet.

Hydraulic Components Guard
Protects lift truck and sidershifter hydraulic components.

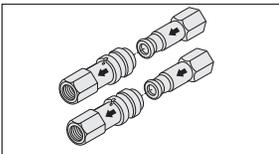

Hydraulic Termination Kit
Allows easy hook-up for hang-on attachments.

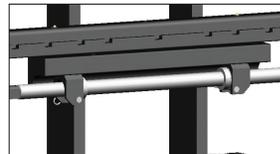

Lower Roller
Reduces amount of pressure required to sidershift load in highly contaminated environment.

300mm Sidershift Stroke available

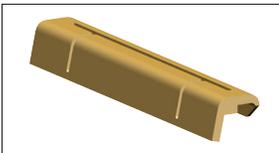

Quick-Disconnect Hydraulic Couplers
A fast connect/disconnect of the installation kit lines

Cylinder Lock-Out Device
Makes it easier to mount attachments.

Available on both C & K Series

Bronze Upper and Lower Bearings
For highly abrasive and contaminated environments.

Bronze Upper Bearings & Lower Hooks
For use in highly abrasive and contaminated environments.

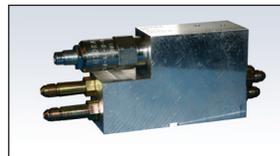

Quick Disconnect Mounting
Allows the sidershifter or fork positioner to be removed from the truck carriage without using hand tools.

The Affordable Hydraulic Solution

Radio Frequency Hydraulic Control
provides a simple, cost effective means to position the forks. Permits the use of a single function auxiliary valve to control an additional hydraulic function. Eliminates the need for additional hydraulic hoses or electric cables and offers a minimum of installation time.

Sequence Valve
Permits fork positioning at the end of the sidershift stroke. Allows fork positioning with a single function auxiliary hydraulic system. (Sidershift left to open forks, sidershift right to close forks).
